

To: FCCFrom: John McGovern

I pay for my satellite radio service. I do so to hear exactly what I want to hear when I want to hear it. If I want to access traffic and weather information without listening to a load of extraneous material, I can do so with XM. I PAY for this service and I don't see how anyone, including the National Association of Broadcasters has any say in this matter. Please consider this when reviewing NAB's petition 04-160. I urge you to reject this petition.

Thank you.
